

MEDIA 40USB

High-Resolution, 150-Watt Bi-Amped Digital Monitor Speakers with USB Input

- 2-way digital monitor speakers ideally suited for computer studios, audio and multimedia workstations
- True bi-amping mode with 4 amplifiers for ultimate high-resolution sound
- 150 Watts of digital power amplification
- Powerful woofers and high-resolution tweeters provide an ultra-linear frequency response
- USB input for direct connection of digital stereo audio sources
- Two stereo analog inputs featuring TRS and RCA connectors can be used simultaneously or mixed with a digital stereo source
- Illuminated Volume control for both Line inputs
- Front panel 1/8" headphone connector with auto-mute loudspeaker function for easy access
- 3-Year Warranty Program*
- Conceived and designed by Behringer Germany

MEDIA 40USB 150-Watt digital monitor speakers combine exceptional connectivity via USB and analog input in a bi-amped, two-way speaker configuration, providing the perfect sonic upgrade for any audio or video application. You're sure to want a pair for every computer workstation in the house – and they make exceptional add-on speakers for flat-screen TVs and self-contained AV media players - as well as the perfect monitor solution for college dorm rooms or anywhere enjoying music is a must.

Bi-Amplification - The Path to Absolute Signal Integrity

With its 150 ultra-clean Watts of digital output, delivered through separately-powered drivers via a true bi-amping mode with 2 amplifiers per speaker, the MEDIA 40USB delivers high-resolution sound that really brings out the best in your music. You will notice that most competitors apply simple passive crossovers, which not only inaccurately separate the frequency spectrum, but most importantly impact the drivers' performance. Behringer has gone the extra mile, driving each woofer and tweeter with a separate amplifier for absolute signal integrity.

Great care was taken to match the system's amplifiers and crossover points specifically to the woofer and tweeter for optimal efficiency. MEDIA 40USB's performance provides ultra-linear frequency response – perfect for multimedia production, or just enjoying sound from your streaming media.

Digital Monitor Speakers with USB Input

USB Simplicity and Elegance

USB connectivity eliminates the need for special cables and adapters, which makes setup a breeze – plus, MEDIA 40USB powered speakers are magnetically-shielded to work perfectly with your computer monitor – even when placed in close proximity to video monitors of all types. To add a touch of style to MEDIA 40USB’s amazing sonic features, we wrapped them in an elegantly streamlined package with gracious curves that complements even the most-sophisticated décor.

Analog at the Ready

Flexibility is built into every pair of MEDIA 40USB speakers. You also have the freedom to connect either a stereo TRS or RCA device to the rear panel inputs of the MEDIA 40USB – or mix them with your computer’s digital audio.

Glowing Control

The beautiful amber glow of MEDIA 40USB’s volume control shows your exact output level and provides an easy go-to knob for fast speaker or headphone level adjustments – plus the internal speakers auto-mute when you connect headphones to the convenient, front-mounted jack.
